Recently retired as Director of Education Services at St. Clair County RESA, I have had significant experience working with seven local districts totaling 30,000 students. In my role as Director, I oversaw the RESA Consolidated Application, as well as assisted local districts as they completed their applications. I attended all trainings offered by Field Services. I also served as an elementary and middle school principal in Title I buildings (Port Huron and Algonac).

I have attended all trainings provided by MDE regarding School Improvement and have provided numerous trainings to St. Clair County districts on School Improvement. I have also been an NCA chair, which adds a dimension to the school improvement requirements. I am extremely familiar with the new SIF Framework, having provided professional development to local schools.
